Teachers' Notes: Begin every class with a prayer. This is a good way to help the child memorize new prayers. Repeat the same ones every day until they are known. Be sure to explain the meanings of the prayers. Repetition in all areas of study is most beneficial. Your student may not need all of Week 8 for review. You can use this time to catch up if necessary and then go over the subject matter. If you intend to use the sample tests provided, look them over before teaching the subjects and make sure you teach the material in the tests. Some children have a difficult time doing written exams, but it is important for them to learn how to take them. If your eighth grader does poorly on them, give them to him orally a couple of days after he has taken them and average the grades.

COURSE PLAN METHODOLOGY: Kolbe Academy has worked diligently to create the best possible course plans with the home schooling family in mind. Remember, however, that our program is intended to be flexible. Per the principle of subsidiarity, these course plans are a **suggested** course of study. As the teacher, you should adapt and modify these course plans to meet the individual learning needs of your child. **Do not feel obligated to follow these course plans exactly.**

The first half is used in the first year Greek course. Emphasis should be placed on repetition and memorization, as these are the primary ways to learn a language. Repetition does not equal drudgery. In the book, and in individual classes, repetition can take the form of games, contests, etc. This is especially helpful for younger students. Generally, the week's work assignments above are very small. Above all, avoid hurried work on one day of the week and no Greek work on the others. The small sections allow ample time for repetition, memorization, and mastery.
